Catalog Number

46090-V1-005

Valve Tool, wrench with 5/16 inch Flat and 1/4 inch opened slit end. ARE-Applied Research brand. 5/PK.

Additional Info

The 46090 V1 005 Valve Tool Wrench (5 Pack) provides a multi user, lab ready solution for safely adjusting HPLC val fittings, particularly on Rheodyne™ and Valco™ injector systems. Each tool features a dual end design that enables technicians to tighten or loosen fittings while tubing remains connected, significantly improving maintenance efficiency and reducing system downtime.

The 1/4" open slit end is specifically engineered to fit over installed tubing and engage 1/4" connecting nuts, allowing adjustments to be made without disconnecting tubing. This is critical for maintaining system integrity, avoiding leaks, and preventing contamination during service operations.

A key benefit of this design is the ability to apply torque without twisting the tubing, helping to avoid:

Kinking or permanent deformation

Flow restrictions and pressure instability
