PRODUCT SHEET

MICROSOLV
TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

45302-03-010

Union, Connector, low pressure, with 1/4-28 screw threads. Nylon. ARE-Applied Research brand. 10/PK.

Additional Info

Low pressure nylon unions are designed for connecting equal size low pressure tubing in laboratory fluidic systems requiring dependable, chemically resistant fluidic connections. The versatile internal design accommodates either 1/16" or 1/8" OD tubing including ETFE, FEP, PFA, and PTFE tubing materials.

The 45302 03 010 (10/Pack) unions are engineered so tubing ends butt directly against one another, creating a zero dead volume connection that helps minimize dispersion and improve flow efficiency in laboratory applications.

Manufactured from durable nylon material, these unions provide high strength and stiffness for reliable low pressure tubing connections when used with compatible finger tight connector nuts.

Key Benefits

Zero dead volume union design

Compatible with both 1/16" and 1/8" OD tubing
