TSCA Conformity Declaration

Dear Customer,

This is to certify that the products manufactured and distributed by MicroSolv Technology Corporation in Leland, North Carolina, USA, comply with the Toxic Substances Control Act (TSCA).

Our manufacturing processes use chemicals in accordance with Section 8(b) of the TSCA. This section requires the EPA to compile, maintain, and publish a list of all chemical substances manufactured, processed, or imported in the United States for uses under TSCA. This list is known as the "TSCA Inventory" or simply "the Inventory," and it plays a central role in regulating most industrial chemicals in the United States.
