HPLC Columns and Chromatography Accessories

Catalog Number

49302-T03-010

Union, connector set, Tee, low pressure, 0.8 mm / 0.031 inch through hole with 1/4-28 screw threads. PEEK, round with an internal "T". Use with 1/16 inch tubing. ARE-Applied Research brand. 10/PK.

Additional Info

Low pressure PEEK Tee union connector sets are designed for connecting three pieces of 1/16" tubing in laboratory and analytical fluidic systems requiring chemically resistant, metal free flow path components. The 0.8 mm (0.031") through hole design and standard 1/4 28 screw threads provide dependable low pressure tubing connections.

The 49302 T03 010 (10/Pack) includes one Tee union body, three finger tight fittings, and three matching polyethylene conical ferrules configured with a standard pilot length for simplified installation and reliable sealing performance.

This Tee union contains two internal 90° flow path turns that allow either blending of two incoming fluid streams or splitting of one incoming stream into two outgoing flow paths, depending on system flow direction.

Key Benefits

Tee configuration for flow splitting or blending
