Additional Info

This general grade PEEK tubing is manufactured from virgin PEEK material without processing additives for chromatography and laboratory fluidic applications.

The 47310 18 10M tubing features a 0.007" (0.18 mm) ID with a 1/32" (0.79 mm) OD for applications requiring low internal volume and narrow flow paths.

No color additives are used, leaving the tubing natural virgin PEEK throughout the internal and external surfaces to minimize potential leachables.

Tubing is carefully cut for length consistency but is not supplied with precision low dead volume end cuts required for some HPLC fitting applications.
