TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

47320-11K

Tubing Connector Fittings, high pressure, one piece, 1/16 inch, PEEK, Black, large Combihead with 10-32 screw threads. Finger or wrench tighten, ARE-Applied Research brand. 10/PK.

Additional Info

The 47320 11K PEEK Tubing Connector Fittings (10/Pack) are high-pressure, one-piece fluidic connection components designed for connecting 1/16 inch OD tubing in HPLC systems. These fittings are compatible with both PEEK and stainless steel tubing and are commonly used in high-pressure flow path applications.

This version features a large combihead design, incorporating a partially knurled, rounded head for finger tightening along with a flat section for wrench tightening, providing both ease of installation and precise torque control.

Constructed from black PEEK, these fittings deliver a bioinert, metal free flow path and allow color-coded system identification for improved lab organization.

Key Benefits

High Pressure Performance (Up to 5,000 psi / 350 bar) Suitable for demanding HPLC applications

Large Combihead Design Knurled for finger tightening plus flat surface for wrench tightening
