Catalog Number

49590-04

Tubing Connector Male Nuts, high pressure, 1/16-inch, Stainless Steel, 19 mm total length with a hex head and 10-32 screw threads. Ferrules sold separately. ARE-Applied Research brand. Bulk Price.

Additional Info

High-Pressure Tubing Connector Male Nuts for HPLC Systems

Our tubing connector male nuts are designed to connect stainless steel tubing in the high-pressure zones of HPLC systems. Made from 316L stainless steel, these fittings feature a standard hexagonal head for easy wrenching and a 19 mm overall length.

Key Features:

Extended Thread Length: Ideal for injectors like the Rheodyne™ brand, where space is limited, allowing the nut to extend from the injector or other fittings.

Durable Construction: Crafted from 316L stainless steel for superior strength and corrosion resistance.

Secure Connections: Designed to work with single cone stainless steel ferrules, ensuring a permanent, high-pressure connection.
