## 47320-11R-005

**Tubing Connector Fittings, high pressure, one piece, 1/16 inch, PEEK, Red, large Combihead with 10-32 screw threads. Finger or wrench tighten, ARE-Applied Research brand. 5/PK.**

### Additional Info

The 47320 11R 005 PEEK Tubing Connector Fittings (5/Pack) are high-pressure, one-piece fluidic connection components designed for connecting 1/16 inch OD tubing in HPLC systems. These fittings are compatible with both PEEK and stainless steel tubing and are widely used in high-pressure flow path applications.

This version features a large combihead design, combining a partially knurled, rounded head for finger tightening with a flat surface for wrench tightening, allowing both ease of installation and controlled torque for secure, leak-free connections.

Manufactured from red PEEK, these fittings provide a bioinert, metal free flow path and support color-coded identification for organizing flow paths, instruments, or users.

Key Benefits

High Pressure Performance (Up to 5,000 psi / 350 bar) Suitable for demanding HPLC fluidic applications

Large Combihead Design Knurled for finger tightening plus flat surface for wrench tightening
