Additional Info

58802-05 MICROSOLV Safety Coated Glass Bottle is a high quality Type 33 borosilicate glass container designed for large volume HPLC mobile phase preparation, reservoir use, and general laboratory solvent handling where safety, durability, and chemical purity are critical.

This larger format bottle is widely used across chromatography, analytical, pharmaceutical, environmental, and general laboratory workflows due to its exceptional glass quality, large capacity, and protective safety coating.

The internal surface is uncoated, chemically inert borosilicate glass, ensuring:

Low extractables and leachables

High solvent purity

Compatibility with aqueous and organic mobile phases
