TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

49302-07

Union, connector set, low pressure, 0.8 mm (0.031 inch) through hole with 10-32 mm screw threads. PEEK, straight line. Use with 1/16 inch tubing. ARE-Applied Research brand. 1 each.

Additional Info

Low pressure PEEK union connector sets are designed for connecting 1/16" tubing in analytical and laboratory fluidic systems requiring chemically resistant, metal free flow path components. The 0.8 mm (0.031") through hole design and standard 10 32 screw threads provide dependable low pressure tubing connections with minimized dead volume.

The 49302 07 includes one straight line PEEK union and two finger tight fittings with built in ferrules and standard pilot lengths for reliable tubing connections and simplified installation procedures.

The flat sections on both the union body and connector nuts allow optional wrench use for an additional 1/8 clockwise turn to improve sealing performance or slight counterclockwise loosening when fittings become difficult to remove by hand.

Key Benefits

Complete all PEEK union connector set
