PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

49312-07

Union, Connector set, low pressure, 1.5 mm / 0.060 inch through hole with 1/4-28 screw threads. PEEK, straight line. Complete with PEEK nuts and ETFE ferrules. ARE-Applied Research brand. 1 each

Additional Info

Low pressure PEEK union connector sets are designed for connecting 1/16" tubing in analytical and laboratory fluidic systems requiring chemically resistant, metal free flow path components. The large 1.5 mm (0.060") through hole design and standard 1/4 28 screw threads provide dependable low pressure tubing connections with increased internal flow capacity.

The 49312 07 includes one straight line PEEK union, two male PEEK nuts with 1/4 28 screw threads, and matching ETFE ferrules with standard pilot lengths for reliable tubing connections and simplified installation procedures.

The flat sections on both the union body and connector nuts allow optional wrench use for an additional 1/8 clockwise turn to improve sealing performance or slight counterclockwise loosening when fittings become difficult to remove by hand.

Key Benefits

Complete all PEEK union connector set
