PRODUCT SHEET

MICROSOLV
TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

9503S-30C-K

CUSTOM ITEM: Caps, Screw Top, with Silicone Rubber / PTFE Pre-Slit Septa, bonded in wide mouth, "knurled", polypropylene, Black Caps. For use with 10-425mm threads, 12x32mm autosampler vials. BASIK Brand. BULK PRICING.

Additional Info

The 9503S 30C K BASIK™ Screw Caps are selected for chromatography workflows requiring reliable autosampler sealing, smoother needle penetration, and bonded septa stability. The bonded silicone rubber/PTFE pre slit septa design helps minimize septa movement and supports consistent injection performance during routine analytical use.

Manufactured with black knurled polypropylene caps and bonded silicone rubber/PTFE pre slit septa, these caps are designed for use with standard 10 425 thread, 12 × 32 mm autosampler vials commonly used in HPLC and GC laboratories. The wide mouth cap configuration provides improved access and needle targeting during autosampler operation.

Bonded Pre Slit Septa Design

Bonded silicone rubber/PTFE septa
