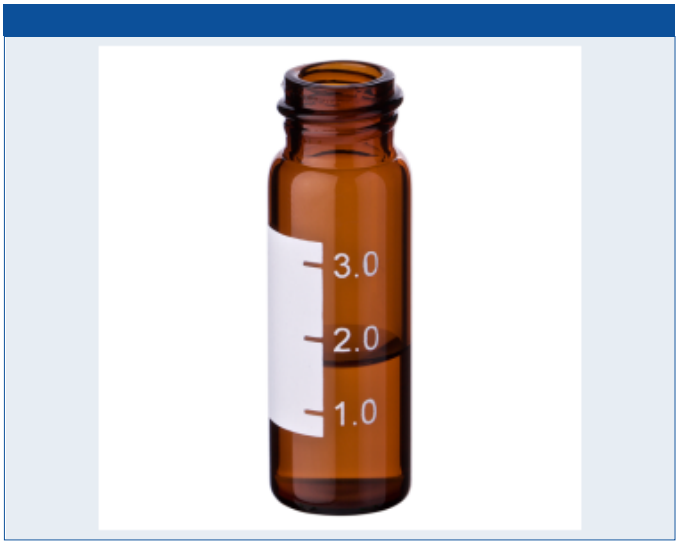
## 9504S-E-WAV

**Vials, Screw Top, Glass. Amber, 4ml, with Write-On Patch and graduations, 13-425mm threads, 15x45mm outer dimensions. For use as an autosampler vial. BASIK Brand. 100/PK.**



### Additional Info

The 9504S E WAV BASIK™ Screw Top Autosampler Vial is an economical 4 /mL amber glass vial designed for laboratories that require protection for light sensitive samples while maintaining easy filling, clear labeling, and cost controlled performance. Manufactured from first hydrolytic, Class /A borosilicate glass, this vial provides reliable chemical durability suitable for routine chromatography workflows.

The 13 425 (ND 13) wide mouth opening allows convenient filling using pipettes or automated liquid handling systems helping reduce handling variability during sample preparation. Integrated write on patches and graduations, applied using epoxy paint, provide a durable labeling surface that resists smearing when exposed to common laboratory solvents.

Amber glass is commonly selected for low actinic sample handling, helping reduce light exposure during storage and autosampler residence. This vial offers strong value for budget minded laboratories and is compatible with autosamplers that require larger format vials, including certain legacy systems.
