PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

9509S-1WCPE-ARS

CUSTOM ITEM: Vial & Cap Kit Includes 100 EA 2ml, Screw Top, Clear RSA™ Autosampler Vials with Write-On Patch and fill lines and 100 EA matching Screw Caps with White Silicone Rubber / Red PTFE Soft-Guard Septa, bonded in the Blue Caps. Vials and Caps are Pre-assembled. RSA Brand Easy Purchase Pack. 1 PK

Additional Info

Custom Configuration with Reduced Surface Activity Vials

This item is supplied as a custom configured RSA™ Vial & Cap Kit, assembled to meet specific analytical and workflow requirements. RSA™ (Reduced Surface Activity) vials are engineered to reduce analyte adsorption to glass surfaces, helping preserve accurate concentration levels for low level or adsorption sensitive compounds.

The clear borosilicate glass allows visual inspection of sample volume and condition while maintaining low extractables and chemical inertness during autosampler residence.

Soft Guard Septa for Controlled Needle Penetration

The included blue screw caps are fitted with white silicone rubber / red PTFE Soft Guard septa, designed to provide gentle, controlled needle penetration while reducing coring and septum wear. This septa design supports consistent injection performance and dependable resealing in routine and validated chromatographic workflows.
