Catalog Number

9532S-3CP-WT-RS

Vial & Cap Kit Includes 100 EA 300ul, Fused Insert with a wide tip, Screw Top, Clear RSA™ Autosampler Vials with Write on Patch and fill lines and 100 EA matching Screw Caps with Clear AQR Silicone Rubber / Clear PTFE, ultra-pure, Pre-Slit Septa, fitted in the Light Blue Caps. RSA Brand Easy Purchase Pack. 1/PK.

Additional Info

Reduced Surface Activity Wide Tip Fused Insert Vials for Improved Recovery

RSA™ reduced surface activity wide tip fused insert vials are designed to improve recovery and reproducibility for low volume samples by integrating the insert directly into the vial. The fused construction eliminates variability associated with loose inserts, such as misalignment, inconsistent needle access, or sample loss beneath the insert.

The wide tip 300 /µL reservoir supports efficient aspiration and reliable sample access, particularly for viscous matrices or applications requiring consistent needle engagement. Combined with reduced surface activity glass chemistry, these vials help support accurate quantitation of limited or high value samples. Clear borosilicate glass allows visual confirmation of sample volume and condition while maintaining low extractables and chemical inertness during autosampler residence.

AQR™ Ultra Pure Pre Slit Septa for LC MS Performance

The included light blue screw caps are fitted with AQR™ ultra pure silicone rubber / PTFE pre slit septa, engineered to
