Additional Info

The 9503S 10C K BASIK™ Screw Caps are selected for chromatography workflows requiring reliable autosampler sealing and bonded septa stability. The bonded silicone rubber/PTFE septa design helps minimize septa movement and supports consistent injection performance during routine analytical use.

Manufactured with black knurled polypropylene caps and bonded silicone rubber/PTFE septa, these caps are designed for use with standard 10 425 thread, 12 × 32 mm autosampler vials commonly used in HPLC and GC laboratories. The wide mouth cap configuration provides improved access and needle targeting during autosampler operation.
