PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

9532S-1ECP-RS

Vial & Cap Kit Includes 100 EA 300ul, Fused Insert, Screw Top, Clear Autosampler Vials with Write on Patch and fill lines and 100 EA matching Screw Caps with White Silicone Rubber / Red PTFE Soft-Guard Septa, bonded in the Blue Caps. RSA Brand Easy Purchase Pack. 1 PK.

Additional Info

Reduced Surface Activity Fused Insert Vials for Improved Recovery

RSA™ reduced surface activity fused insert vials are designed to improve recovery and reproducibility for low volume and trace level samples by integrating the insert directly into the vial. The fused construction eliminates common issues associated with loose inserts, including misalignment, inconsistent needle access, and sample loss beneath the insert.

The defined 300 /µL sample reservoir, combined with reduced surface activity glass chemistry, supports consistent sample positioning and efficient aspiration for limited or high value samples. Clear borosilicate glass allows visual confirmation of sample volume and condition while maintaining low extractables and chemical inertness during autosampler residence.

Soft Guard Septa for Controlled Needle Penetration

The included blue screw caps are fitted with white silicone rubber / red PTFE Soft Guard septa, designed to provide gentle, controlled needle penetration while reducing coring and septum wear. This septa configuration supports reliable resealing
