PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

9532S-1ECP-WTRS

Vial & Cap Kit Includes 100 EA 300ul, Fused Insert with a wide tip, Screw Top, Clear RSA Autosampler Vials with Write on Patch and fill lines and 100 EA matching Screw Caps with White Silicone Rubber / Red PTFE Soft-Guard Septa, bonded in the Blue Caps. MICROSOLV Brand Easy Purchase Pack. 1 PK.

Additional Info

Reduced Surface Activity Wide Tip Fused Insert Vials for Improved Recovery

RSA™ reduced surface activity wide tip fused insert vials are designed to improve recovery and reproducibility for low volume and trace level samples by integrating the insert directly into the vial. The fused construction removes common issues associated with loose inserts, including misalignment, inconsistent needle access, and sample loss beneath the insert.

The wide tip 300 /µL reservoir supports efficient aspiration and dependable needle engagement, making it well suited for viscous matrices or workflows requiring reliable access to small sample volumes. Reduced surface activity glass chemistry further helps preserve sample integrity by minimizing analyte adsorption. Clear borosilicate glass allows visual confirmation of sample volume and condition while maintaining low extractables and chemical inertness during autosampler residence.

Soft Guard™ Septa for Controlled Needle Penetration

The included blue screw caps are fitted with white silicone rubber / red /PTFE Soft Guard™ septa, designed to provide
