PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

9582S-30C-K

CUSTOM ITEM: Caps, Screw Top, with 1.3mm thick Silicone Rubber / PTFE Pre-Slit Septa, fitted in "knurled", polypropylene, Black Caps with 5.5mm center holes. For use with 8-425mm thread, 12x32mm autosampler vials. BASIK Brand. BULK PRICING.

Additional Info

Improve autosampler efficiency and injection performance with screw top caps designed for reliable sealing and ease of needle penetration.

9582S-30C-K caps feature a knurled polypropylene design for enhanced grip and ease of handling during manual or automated workflows. The 5.5 mm center hole provides a larger target area for autosampler needles, helping reduce alignment issues and improving injection consistency in high throughput environments.

The 1.3 mm thick silicone rubber / PTFE pre slit septa allows smoother needle penetration while maintaining resealability during repeated injections. The PTFE layer provides chemical resistance and inertness, while the silicone backing ensures flexibility and durability, making these caps suitable for a wide range of HPLC and LC MS applications.

Key Benefits

Pre slit septa enables easy needle penetration
