

## Standard silicone pre slit Sealing Mat compared to Solvent Resistant Mat - FAQ

### **Comparison of 96 well sealing mats, Silicone Rubber vs. Chemical Resistant U-2D mats.**

Silicone rubber mats should only be used with pure aqueous and buffer solutions.

The solvent resistant mat can be used with methanol, acetonitrile and water / buffers. These should not be used with non-polar solvents or aggressive acid or base such as ethyl acetate. The maximum temperature for these mats is 100°C.
