Catalog Number

46030-02-005

Wrench, 3/8" x 7/16", Open Ended. Flat. ARE-Applied Research brand. 5/PK.

Additional Info

The 46030 02 005 Open End Wrench (5 Pack) is a multi user precision tool set designed for laboratories working wi larger HPLC fittings, injector valves, and instrument plumbing, where proper torque application and secure engagement are essential.

Each wrench features dual open end sizes (3/8" and 7/16"), making it ideal for larger fittings commonly found in chromatography systems. The flat, precision machined openings are designed to fully engage fitting flats without excessive over hang, reducing the risk of slippage, rounding, or damage to critical components.

A key advantage of this tool is its optimized shaft length, which provides the ideal balance between leverage and control. This allows technicians to:

Apply sufficient torque to achieve secure connections

Avoid over tightening that can damage fittings or threads
