Additional Info

This HPLC grade PEEK tubing is manufactured from virgin PEEK material without processing additives for chromatography applications requiring chemically resistant fluidic pathways and low extractables.

The 47305 07 tubing features a 0.007" (0.18 mm) ID with a 1/16" (1.6 mm) OD. The yellow stripe is applied only to the exterior tubing surface, while the internal flow path remains natural virgin PEEK to minimize potential color leachables.
