PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

58847-01-002

Mobile Phase Filter, 20 um, white, polyethylene, 1/16 inch connector. EPP-Porous Products brand. 2/PK.

Additional Info

These polyethylene filters are designed to provide exceptional filter capacity and throughput, making them ideal for HPLC applications. These biocompatible filters are perfect for use with 1/16-inch (1.6 mm) tubing and feature PEEK tubing connectors for reliable performance.

Key Benefits:

High Filter Capacity: Effectively filters out larger, undissolved particles with a 20 µm porosity, protecting your HPLC pumps, columns, and instruments from potential damage.

Low Resistance: Offers less resistance to vacuum and solvent inflow compared to 2 µm or 10 µm filters, ensuring efficient operation.

Easy Particle Detection: The white filter element allows for quick visual inspection of trapped particles, making it easy to determine when replacement is needed.
