PRODUCT SHEET

MICROSOLV
TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

65518-15P-2

HPLC Column, Zx Similars C18, 5um, 2.1mm ID x 150mm Length. Cogent Brand. 1 EA.

Additional Info

Zx Similars C18™ is a traditional reversed-phase HPLC stationary phase manufactured on high-purity Type-B spherical silica with a fully endcapped octadecyl (C18) bonded phase. Designed as a cost-effective alternative to Agilent Zorbax® C18 columns, it offers comparable chromatographic behavior for USP L1 methods while providing the strong hydrophobic retention, reproducibility, and broad applicability expected from a conventional C18 stationary phase.

65518-15P-2 is a 150 mm x 2.1 mm ID narrow-bore analytical column packed with 5 µm Zx Similars C18 particles. The 150 mm length provides increased resolving power for more demanding separations, while the 2.1 mm ID format minimizes solvent consumption and is particularly well suited for LC-MS applications. The 5 µm particle size provides excellent robustness, broad method compatibility, and lower operating pressure than smaller particle columns. Typical operating flow rates are approximately 0.2 – 0.3 mL/min and require an HPLC or LC-MS system capable of reliable low-flow operation with low-volume plumbing and flow cells.

This USP L1 column is ideal for hydrophobic and neutral compounds requiring strong reversed-phase retention...
