PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

65518-15P-4

HPLC Column, Zx Similars C18, 5um, 4.0mm ID x 150mm Length. Cogent Brand. 1 EA. Special Order Item.

Additional Info

Zx Similars C18™ is a traditional reversed-phase HPLC stationary phase manufactured on high-purity Type-B spherical silica with a fully endcapped octadecyl (C18) bonded phase. Designed as a cost-effective alternative to Agilent Zorbax® C18 columns, it offers comparable chromatographic behavior for USP L1 methods while providing the strong hydrophobic retention, reproducibility, and broad applicability expected from a conventional C18 stationary phase.

65518-15P-4 is a 150 mm x 4.0 mm ID analytical column packed with 5 µm Zx Similars C18 particles. The 150 mm length provides an excellent balance of resolution and analysis time, making it suitable for routine analytical methods, pharmaceutical testing, and quality control applications. The 5 µm particle size provides excellent robustness, broad method compatibility, and lower operating pressure than smaller particle columns, making it well suited for conventional HPLC systems. The 4.0 mm ID format is commonly selected for legacy methods and typically operates at approximately 0.8 – 1.5 mL/min.

This USP L1 column is ideal for hydrophobic and neutral compounds requiring strong reversed-phase retention. Common applications includ...
