PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

68022-10P

HPLC Column, RP PFP, 10um, 4.6mm ID x 100mm Length, 100A. Cogent Brand. 1 EA.

Additional Info

68022-10P Cogent RP PFP™ HPLC Column has been a premium value trusted by HPLC laboratories for many years, delivering reliable performance and enhanced selectivity for a wide range of separations. This column is fully double end capped and bonded via a four carbon linker to a benzene ring substituted with five fluorine atoms, using ultra high purity silica.

The column enables multiple retention mechanisms—including π π interactions, dipole interactions, and hydrogen bonding—making it highly effective for halogenated, aromatic, and polar analytes. It is also suitable as an alternate column for USP methods requiring L43 classification.

With a 10 µm particle size, this column provides very low backpressure compared to smaller particle columns, allowing higher flow rates and excellent system compatibility, particularly for systems with pressure limitations.

100 mm Length – Balanced Resolution with High Flow Capability

The 100 mm length delivers a balance between resolution and speed while supporting higher flow operation.
