PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

68022-P30-150

Prep HPLC Column, RP PFP, 10um, 100A. 30mm ID x 150mm Length. Cogent Brand. 1 EA.

Additional Info

This Cogent RP PFP™ or RP Pentafluorophenyl Stationary Phase has been a premium value used by HPLC laboratories for many years and routinely called "F5". It is double end capped (fully) and bonded with a four carbon link to a benzene ring with 5 Fluorines on the highest purity 100A silica available.

With a 10µm Particle, this column works well with higher flow rates producing low back pressures in preparative HPLC making this column ideal for purification of halogenated or polar samples.

A specialized HPLC System is required for this column which is packed and shipped in Reversed Phase Solvents.

Notes - A specialized HPLC System is required for columns this size. This is a CUSTOM ORDER manufactured item which cannot be returned or canceled once an order has been placed. Click HERE for more information on what is a Custom Order.
