PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

82360-15P-3M

HPLC Column, NP Diol, Wide Pore, 3um, 4.6mm ID x 150mm Length, 300A. Cogent Brand. 1 EA.

Additional Info

Cogent NP Diol™ Wide Pore HPLC Columns are designed for the separation of hydrophilic, polar, and larger molecular weight compounds using Normal Phase and HILIC chromatography modes. Manufactured using high-purity 300Å wide-pore silica bonded with a short hydrocarbon ligand containing a terminal diol functional group, this stationary phase is not end capped and provides enhanced accessibility for larger molecules while maintaining the selectivity expected from a diol phase. NP Diol™ Wide Pore columns are widely used as an alternative for USP L20 methods and for analytical methods involving biomolecules, proteins, peptides, and other large molecular weight analytes.

82360-15P-3M is packed with 3 µm NP Diol™ Wide Pore particles in a 4.6 mm ID x 150 mm analytical format. The 150 mm column length provides enhanced resolution and peak capacity compared to shorter formats, making it ideal for demanding analytical separations involving larger molecules. The 3 µm particle size delivers higher efficiency and sharper peak shapes than comparable 5 µm columns, although increased operating pressure should be expected. This format offers excellent performance for complex sample matrices re...
