9502SB-06

Storage Box for 2ml Autosampler Vials. Natural, chemical resistant polypropylene holds 81 vials. Complete with translucent plastic lid. 1 EA.

Additional Info

Improve sample organization, storage, and transportation with a durable storage box designed specifically for 2 mL autosampler vials. The compact footprint helps maximize storage efficiency while protecting valuable samples during routine laboratory handling. Manufactured from chemical resistant polypropylene, this storage box is built for dependable performance in analytical, pharmaceutical, environmental, and research laboratories.

9502SB-06 storage boxes accommodate up to 81 autosampler vials and are ideal for benchtop organization, sample transportation, and space saving storage in refrigerators and freezers. The included translucent lid allows rapid visual inspection of contents while helping reduce condensation formation on vial caps. This added protection can help minimize contamination and preserve sample integrity throughout storage and handling.

Alpha numeric indexing is molded into the bottom of the wells and along the sides of the box, allowing efficient sample identification and inventory management. With a usable temperature range of -80°C to +100°C, the box is suitable for a wide range of laboratory storage conditions. Both the box and lid are autoclavable, ...
