PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

97021-0AV

CUSTOM ITEM: Vials, EPA Style, Glass. Amber, 20ml. 57x27.5mm outer dimensions. For use as an EPA test vial or storage bottle. ND24 threads. BASIK Brand. BULK PRICING.

Additional Info

Provide a cost effective solution for environmental testing and storage of light sensitive samples with EPA style amber glass vials designed for reliability and compatibility.

97021-0AV vials are manufactured from amberized First Hydrolytic, Class A, Type N51A borosilicate glass, offering excellent chemical resistance and durability while helping protect light sensitive compounds from degradation. The amber, low actinic glass reduces exposure to UV and visible light, making these vials suitable for sensitive sample storage.

These vials have an approximate total fill capacity of 23.3 mL and are designed with a standard ND24 (24 414) screw thread, allowing compatibility with a variety of EPA style caps and closures. As part of the BASIK line, they provide a lower cost alternative for laboratories requiring dependable performance in routine testing and storage applications.

Key Benefits

Amber glass protects light sensitive compounds (low actinic)
