PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

97031-0CV

Vials, EPA Style, Glass. Clear, 30ml. 70x27.5mm outer dimensions. For use as an EPA test vial or storage bottle. ND24 threads. BASIK Brand. 100/PK.

Additional Info

Provide a cost effective solution for environmental testing and routine laboratory workflows with EPA style clear glass vials designed for consistent performance and compatibility. Manufactured from First Hydrolytic, Class A, Type 33 borosilicate glass, these vials offer reliable chemical resistance and durability while maintaining a lower cost profile for budget minded laboratories. The clear glass construction allows full sample visibility for inspection, identification, and quality control.

97031-0CV vials have an approximate total fill capacity of 31 mL and are well suited for sample collection, storage, and transport in EPA and environmental testing workflows. The standardized ND24 (24 414) screw thread ensures compatibility with commonly used EPA style caps and closures, enabling seamless integration into existing laboratory processes and supporting high volume use.

When used with proper caps (sold separately), these vials provide dependable sealing and containment for a wide range of laboratory applications. This format is ideal for laboratories seeking economical EPA style vials without sacrificing essential performance for routine testing and storage needs.
