Catalog Number

97040-SP-24

Caps, Screw Top, Solid, with Red Butyl Rubber / Grey PTFE Liner, fitted in knurled polypropylene, White Caps. For use with 24-400mm threaded EPA Style vials. ND24 threads. MICROSOLV Brand. 100/PK.

Additional Info

Provide secure, high integrity sealing for EPA style vials with solid top screw caps engineered for long term storage and transport applications. Constructed from durable knurled polypropylene, these caps offer excellent grip and consistent handling while maintaining a tight seal in demanding laboratory environments. The solid top design eliminates any center opening, ensuring complete containment for sensitive or volatile samples.

97040-SP-24 caps feature a 2.5 mm thick butyl rubber / PTFE liner with a 55 Shore A hardness, delivering a firm and resilient compression seal. The butyl rubber component provides superior gas and vapor barrier performance, making it ideal for volatile compounds, while the PTFE layer offers chemical inertness to minimize interaction with stored samples. This liner combination is well suited for EPA testing and extended storage where both sealing strength and chemical compatibility are critical.

These caps are compatible with 30 mL, 40 mL, and 60 mL EPA style vials using ND24 (24 400) threads. Their solid, non penetrable configuration makes them ideal for applications where injection is not required, ensuring reliable sealing during storage or tr...
