Catalog Number

97041-0AV

CUSTOM ITEM: Vials, EPA Style, Glass. Amber, 40ml. 95x27.5mm outer dimensions. For use as an EPA test vial or storage bottle. ND24 threads. BASIK Brand. BULK PRICING.

Additional Info

Provide a highly economical solution for large volume environmental testing and storage of light sensitive samples with EPA style amber glass vials designed for reliability and compatibility. Manufactured from amberized First Hydrolytic, Class A, Type N51A borosilicate glass, these vials offer excellent chemical resistance, low extractables, and durability while protecting samples from photodegradation. The low actinic amber glass is ideal for laboratories handling sensitive compounds in both regulated and routine workflows.

97041-0AV vials have an approximate total fill capacity of 42.9 mL and are well suited for sample collection, storage, and transport in EPA and environmental testing applications requiring larger volumes. The standardized ND24 (24 414) screw thread ensures compatibility with commonly used EPA style caps and closures, allowing seamless integration into existing laboratory workflows while supporting high volume usage at a lower cost.

When used with appropriate caps (sold separately), these vials provide dependable sealing and containment for a wide range of laboratory applications. As part of the BASIK product line, they are a cost effective option for l...
