PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

97041-0CV

Vials, EPA Style, Glass. Clear, 40ml. 95x27.5mm outer dimensions. For use as an EPA test vial or storage bottle. ND24 threads. BASIK Brand. 100/PK.

Additional Info

Provide a highly economical solution for large volume environmental testing and storage workflows with EPA style clear glass vials designed for consistency and durability. Manufactured from First Hydrolytic, Class A, Type 33 borosilicate glass, these vials offer reliable chemical resistance and strength while delivering significant cost savings for high volume laboratory operations. The clear glass construction allows full sample visibility for inspection, identification, and quality control.

97041-0CV vials have an approximate total fill capacity of 43 mL and are ideal for sample collection, storage, and transport in EPA and environmental testing workflows requiring larger volumes. The ND24 (24 414) screw thread ensures compatibility with commonly used EPA style caps and closures, allowing easy integration into existing methods and processes while helping laboratories reduce overall consumable costs.

When used with compatible caps (sold separately), these vials provide dependable sealing and containment for routine testing and storage. As part of the BASIK product line, they are a big money saving option for laboratories that need reliable EPA style vials without the prem...
