PRODUCT SHEET

MICROSOLV TECHNOLOGY CORPORATION
HPLC Columns and Chromatography Accessories

Catalog Number

97041-SC24

Caps, Screw Top, with Natural Silicone Rubber / Natural PTFE Septa, bonded in knurled polypropylene, White Caps. For use with 24-414mm threaded EPA Style vials. ND24 threads. BASIK Brand. 100/PK.

Additional Info

Provide dependable sealing and injection performance with screw top caps designed for EPA style vials used in both analytical and storage workflows. Manufactured with bonded silicone rubber / PTFE septa, these caps offer a durable and chemically resistant sealing interface for a wide range of laboratory applications. The knurled polypropylene construction ensures secure handling and consistent torque during closure.

97041-SC24 caps feature a 3.18 mm (0.125 ″) thick septa, providing durability and extended performance during repeated needle penetrations or long term storage. The bonded septa design improves sealing integrity by preventing septa dislodging during use. The 12.5 mm center hole allows consistent needle access, making these caps suitable for autosampler applications as well as secure storage of samples.

These caps are compatible with 30 mL, 40 mL, and 60 mL EPA style vials using ND24 (24 414) threads, offering flexibility across multiple vial sizes. They are well suited for laboratories requiring reliable caps for both analytical injection and long term containment.
